

Disc Measurements

We Need:

- A.) The center section measurement, hinge pin to hinge pin.
- B.) On the wing, we need the measurement from the hinge pin to the outside furthest disc or furrow filler. (Please include any furrow fillers in this measurement)
- C.) How tall are the discs (i.e. 22", 24", etc.)
- D.) How many discs are on each section, and the overall spacing between the discs.
- E.) The Mainframe Tube, height and width. (i.e. 4" tall by 4" wide)
- F.) The Disc Gang Tube, height and width. (i.e. 3" tall by 3" wide)

****Please make sure the Disc does not have a rear hitch. We cannot custom-build harrows to fit around factory hitches.***
