

Field Cultivator Measurements

We Need:

- A.) The center section measurement, hinge pin to hinge pin.
- B.) On a three-section fold, we need the measurement from the hinge pin to the outside cultivator point. On a five-section fold, we need the measurement from the hinge pin to the other hinge pin.
- C.) On the five-section fold outer wing (if equipped), we need the measurement from the hinge pin to the outside cultivator point.
- D.) The Mainframe Tube, height and width. (i.e. 4" tall by 4" wide)

****Please make sure the Field Cultivator does not have a rear hitch.
We cannot custom-build harrows to fit around factory hitches.***
